## **RE: [ position ]**

To whom it may concern,

My name is Yael Namen. I am a software developer with 15+ years experience across several fields, doing full-stack web development—focusing on backend and system design—and more recently, DevOps and infrastructure engineering. I am detail oriented, and enjoy working on hard problems. I am passionate about improving things for the whole team/org. That can mean process improvements; writing docs; picking up the work other folks don't have the time/interest to pick up (e.g. this is how I got into DevOps). I am always learning, and enjoy sharing what I know with other engineers, whether through mentoring, book clubs, or tech talks.

[ Specific example aligned with something big they're asking ]

Sincerely,

Yael Namen
